

Hose & Tube Assemblies for OEM Applications

World class manufacturing.

Power Drives, Inc. (PDI) is a Tier One and Tier Two TS 16949 certified manufacturer of engineered hose and tube assemblies for Original Equipment Manufacturers (OEM). From concept to production, we provide complete end-to-end design and production solutions for increased performance, functionality and reliability in your products.

With multiple manufacturing locations, PDI optimizes production processes and reduces supply chain risk. We take pride in our premier product offerings as well as our safety and quality measures, and we welcome the opportunity to work with you.

Expertise in Multiple Markets

PDI's custom hose and tube assemblies are used in fuel (diesel, LNG, CNG, Biodiesel), air, exhaust, brakes, cooling, hydraulic power and pneumatic applications. Specific markets include:

- Heavy duty truck and bus
- Construction and off-road vehicles
- Mining equipment
- Power generation equipment
- Wind energy systems
- Locomotives
- Farm vehicles and agricultural equipment
- Marine applications
- Military vehicles and equipment
- Lift trucks and materials handling

DESCRIPTION

A

INITIAL

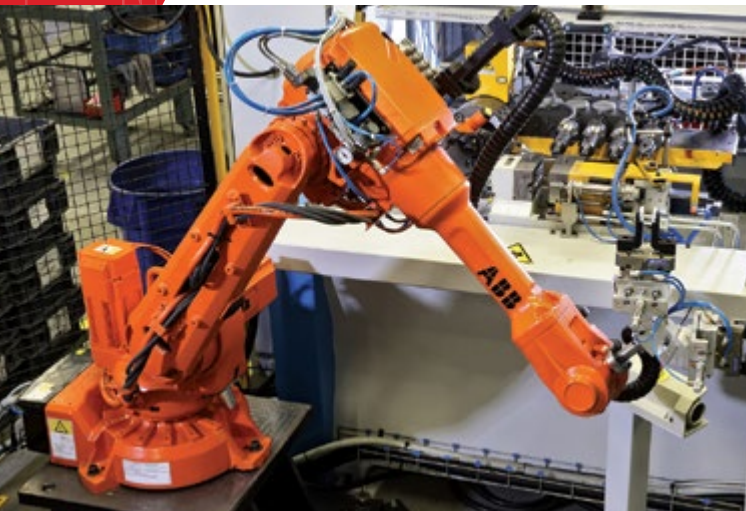

Excellence at every step.

Quality Management

PDI's adherence to the ISO/TS 16949 Quality Standard assures you that we meet strict customer quality requirements, every time. Comprehensive quality and durability testing is conducted at critical stages throughout the production process.

Our quality management capabilities include:

- Millipore testing
- Burst and pressure testing
- 100% leak testing of assemblies
- In-process and end-of-line fixtures
- Coordinate Measuring Machine (CMM)
- Pick Pack Ship error proofing
- Proprietary cleaning process
- Vision inspection system

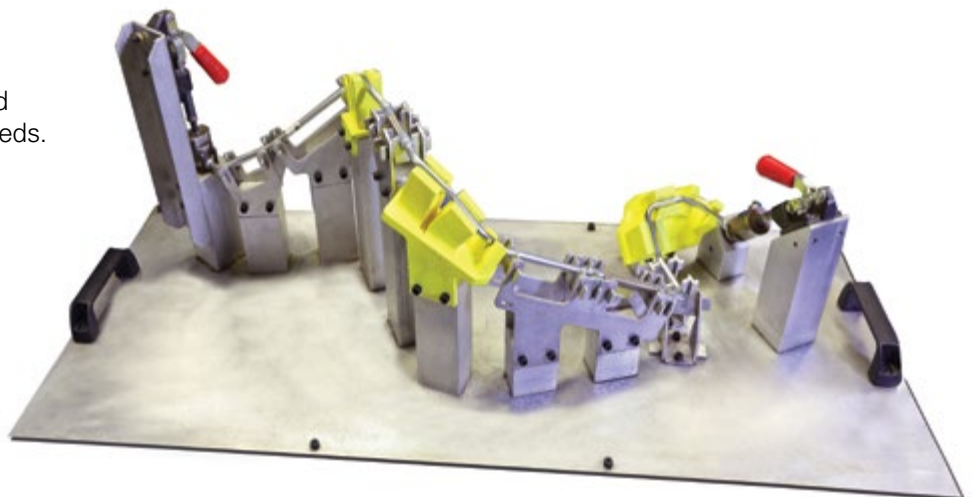

Operations Management

PDI's culture of lean manufacturing and our management systems are designed to be highly responsive to customer needs.

Our operations management capabilities include:

- Capacity for large and small production quantities
- Flexibility to accommodate short notice order quantity changes
- Rapid implementation of engineering change orders
- Customized packaging for line-side stocking

Committed to delivering quality products, on time — every time.

Distinction in design.

Application Assemblies

Each application presents a unique set of design challenges. Shock, vibration, environmental extremes and continuous operation must be met with the optimum combination of materials and design to create assemblies that function reliably under demanding operating conditions. PDI experts have the vision and knowledge to design and build high pressure and low pressure fluid conveyance assemblies to meet your toughest parameters.
